

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained. To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Invesco Euro Ultra-Short Term Debt Fund (the "Fund") aimed to promote environmental characteristics related to natural resource utilization and pollution (by excluding companies involved in coal extraction and production, and unconventional oil and gas such as Arctic oil and gas exploration/extraction, oil sands extraction and Shale Energy extraction). The Fund also promoted social characteristics related to human rights (by excluding companies in violation of any UN Global Compact's principles, based on third-party data and the Investment Manager's proprietary analysis and research) and by excluding issuers involved in tobacco production and tobacco related products and services, recreational cannabis, controversial weapons and manufacture of nuclear warheads or whole nuclear or whole nuclear missiles outside of the Non-Proliferation Treaty.

The environmental and social characteristics of the Fund were achieved by applying the exclusions criteria described above.

How did the sustainability indicators perform?

Product name:Invesco Euro Ultra-Short Term Debt Fund

The Fund used a variety of indicators to measure the attainment of the environmental and social characteristics. This included:

Sustainability Indicator	Indicator Performance
UN Global Compact, excluded if non-compliant	During the reference period, there were no active breaches of the Fund's exclusion criteria.
International sanctions, sanctioned investments are prohibited	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Controversial weapons, excluded if 0%, including companies involved in the manufacture of nuclear warheads or whole nuclear missiles outside of the NPT.	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Coal, excluded if Thermal Coal extraction >=5% of revenue, Thermal Coal Power generation >=10% of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Unconventional oil & gas, excluded if >=5% of revenue on each of the following: - Artic oil & gas exploration; - Oil sands extraction; - Shale energy extraction;	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Tobacco excluded if Tobacco Products production >=5% of revenue, Tobacco-related products and services >=5% of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.
Recreational canabis, excluded if >=5% of revenue	During the reference period, there were no active breaches of the Fund's exclusion criteria.

...and compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

Not applicable.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and antibribery matters. How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

Not applicable.

How were the indicators for adverse impacts on sustainability factors taken into account?

Not applicable.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Not applicable.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on sustainability factors (PAIs) by carrying out a qualitative and quantitative review of key metrics (primarily the 14 indicators as defined in Table 1 of the Annex I of the regulatory technical standards for Regulation 2019/2088). The quantitative review included a review of Invesco's Article 8 and 9 product holdings and the relevant PAI data. Through this initial review an absolute threshold was set that flagged issuers that failed to meet minimum standards, as well as companies that flagged on a binary output (such as controversial weapons or UN Global Compact violations). Once issuers were flagged for the quantitative review, an assessment was completed to understand if there is publicly available information from the issuer that we are aware of that can be shown to be addressing the poor performance on the flagged PAI. The ESG research team assigned the issuer a qualitative score as to how well they were addressing the poor performance. Those issuers that received the lowest qualitative scores were then identified as engagement targets and were primarily engaged through methods such as letters, meetings, proxy voting. If no improvement was established through such corporate engagement, then the Fund could consider divesting and/or excluding investments.

The below table shows the PAI data for the Fund:

Adverse sustainability								
indicator	PAI	Data	Metric					
	1.GHG Emissions	11,857.46	Scope 1 fund financed emissions (Tonnes of CO2 equivalent)					
		1,990.55	Scope 2 fund financed emissions (Tonnes of CO2 equivalent)					
		112,405.94	Scope 3 fund financed emissions (Tonnes of CO2 equivalent)					
		126,253.96	Total Financed emissions (Scope 1 + Scope 2 + Scope 3) (Tonnes of CO2 equivalent)					
	2. Carbon footprint	592.37	Fund level Carbon footprint (Scope 1 + Scope 2 + Scope 3) (Per Million EUR Invested)					
	3. GHG Intensity of investee companies	1120.42	Fund level Total Emission Intensity-Scope 1+2+3 (Per Million EUR Revenue)					
	4. Exposure to companies active in the fossil fuel		% of the fund exposed to any fossil fuels revenue					
	sector	0						
	5. Share of non-renewable energy consumption	61.41	Adjusted Weighted Average of all issuers in the fund's share of non-renewable energy consumption					
	5. Share of non-renewable energy production	15.63	and non-renewable energy production of investee companies from non-renewable energy sources compared to renewable energy sources, expressed as a percentage of total energy sources (%)					
	6. Energy consumption intensity per high impact	13.03	compared to renewable energy sources, expressed as a percentage of total energy sources (%)					
Greenhouse gas emissions	climate sector							
	Agriculture, Forestry & Fishing	5.39						
	Construction	0

Toyota Motor Finance Netherlands BV 3.375% EUR 13/01/2026	Consumer Discretionary	0.92%	Netherlands

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

The exclusions were screened to the full investment universe, representing at least 90% of the portfolio (#1 Aligned with E/S characteristics) by virtue of the binding elements of the Fund's investment strategy. Ancillary liquid assets and money market instruments which were held for cash management/liquidity purposes may not have been assessed for compliance with the above exclusion framework (#2 Other).

What was the asset allocation?

100.00% of the Fund's NAV was selected according to the binding elements of the investment strategy, on the basis that they aligned with the environmental and social characteristics of the Fund.

-0.07% of the Fund's NAV was invested in financial derivative instruments for hedging and/or efficient portfolio management purposes; and

6.22% cash was held for ancillary liquidity purposes.

All the above data is provided as of 28 February 2023.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers sustainable investments with environmental or social objectives

- The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

The below table shows the GICS sector breakdown as at 28 February 2023

Sector (GICS)	Weight %
Financials	52.60
Utilities	7.94
Consumer Discretionary	7.27
Health Care	6.92
Industrials	6.22

10102020	Oil & Gas Exploration & Production	0.00
10102030	Oil & Gas Refining & Marketing	0.00
10102040	Oil & Gas Storage & Transportation	0.00
10102050	Coal & Consumable Fuels	0.00
	Total	1.52

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

Whilst the Fund did not commit to a minimum of sustainable investments with an environmental objective aligned with EU Taxonomy, **1**% (Turnover) of the Fund's portfolio was aligned with the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Enabling activities directly enable other activities to make a substantial contribution to an environmental

To comply with the EU

Taxonomy, the criteria for **fossil gas** include

limitations on emissions

carbon fuels by the end of 2035. For **nuclear energy**, the criteria

include comprehensive safety and waste

management rules.

What was the share of investments made in transitional and enabling activities?

The below table shows the share of investments in transitional and enabling activities as at 28th February 2023.

	Aligned
Enabling	0.52%
Transition	0.00%

'Aligned' means % of revenues of the investments of the Fund that are aligned to the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

Not applicable.

What was the share of socially sustainable investments?

Not applicable.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeauards?

 ${f X}\%$ of the Fund's asset allocation was included under "Other". As described above, the Fund could hold ancillary liquid assets or money market instruments for cash management/liquidity purposes The Fund held ancillary liquid assets or money market instruments for cash management/liquidity purposes which were not assessed for compliance with the above exclusion framework. Due to the neutral nature of the assets, no minimum safeguards were in place.

Index derivatives were not assessed on a look-through basis, unless such an index had a significant allocation to prohibited activities.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund achieved the environmental and social characteristics by complying with the exclusion framework, which was consistent with attaining the environmental and social characteristics promoted by the Fund.

Please refer to the section "How did the sustainability indicators perform" above for further information.

In addition, as part of the Fund's consideration of principal adverse impacts on sustainability factors, the ESG team monitored the investments against PAI indicators. Invesco conducted research into certain issuers in the Fund's portfolio that were deemed to flag against PAI indicators. Please see below examples of researched issuers during the reference period:

e financial

product

Holding	Principal Adverse Impact	r Action Taken
An EMEA Energy Issuer	PAI 7: Activities negatively affecting	Research conducted. The issuer initially flagged on PAI 7 (Activities negatively affecting biodiversity sensitive areas).
	biodiversity sensitive areas	Invesco conducted additional research on the issuer, and determined that the entity has committed to address the issue
		and is developing a strategy.
		When researching the issuer, Invesco found the issuer has put in place a biodiversity position that from 2022 includes
		existing operating sites and makes a commitment to enhance biodiversity and support restoration. The issuer has also
		specifically addressed the controversies, such as in Senegal and Louisiana, flagged by the third-party data provider
		through statements and press releases.
A North American Real	PAI 6: Energy consumption intensity	Research conducted. The issuer initially flagged on PAI 6 (Energy consumption intensity). Through additional research,
Estate Issuer		Invesco has determined the the entity has committed to address the issue and is developing a strategy.
		In June of 2022, the company committed to net zero across the value chain for 2040 (which includes scope 1, 2 and 3).
		The company has also set interim targets for net zero operations (scope 1 and 2 by 2030). As a part of this effort, the
		company is committed to setting an SBTI and they have disclosed emissions in their CDP report. They have included
		multiple milestones for decarbonation strategies: 1 GW of solar generation capacity (supported by storage) by 2025;
		carbon neutral construction by 2025; net zero for operations by 2030.
An EMEA Energy Issuer	PAI 7: Activities negatively affecting	Research conducted. The issuer initially flagged on PAI 7 (Activities negatively affecting biodiversity sensitive areas).
	biodiversity sensitive areas	Invesco conducted research on the issuer and has determined that the entity has committed to address the issue and is
		developing a strategy.
		The issuer has outlined its commitment to protect biodiversity through a four pillar plan: 1) respecting voluntary
		exclusion zones; 2) managing biodiversity in new projects; 3) managing biodiversity in existing sites, and 4) promoting
		biodiversity.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. How did this financial product perform compared to the reference benchmark?

Not applicable.

How does the reference benchmark differ from a broad market index?

Not applicable.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

Not applicable.
